

SEAMLESS SOLUTIONS

Vapor Vacuum Capping and Sealing machines are some of the harshest environments in a bottling plant. The high heat and steam create issues that can cause production challenges in an otherwise smooth-running operation.

Rainbow Rubber & Plastics has successfully eliminated the belting issues in this application. With years of in-plant experience, Rainbow specializes in endless belt technology, high wear applications. Backing tear out and breaking can be a thing of the past.

Advantages:

- **Single piece construction, no seams or splices to fail**
- **Rubber compounds designed for the harsh environment**
- **Stock for immediate shipment**
