

Rubber bonded metal rotary seals are now available!

Replacement parts for Troester branded systems, these are critical in the use of their variable endseal systems. Used in pairs, these replace traditional CV gasket endseals in the CV process, ensuring tight seal on the wire and cable during its vulcanization.

Currently Offering sizes:

- 34mm
- 70mm
- 135mm

Local inventory and service from our Reading, Pennsylvania distribution center. Ask about our recovering procedure and stocking arrangements. Don't let long lead times impact your production!
